

DrChrono Integration Workflow

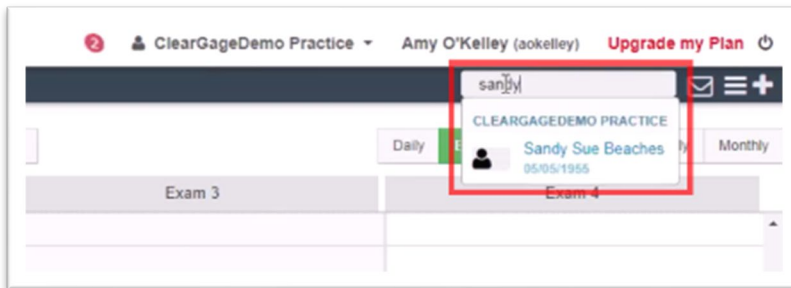

A key to success is understanding how the integration between ClearGage and DrChrono works.

DrChrono Sends ClearGage Financial information. ClearGage takes that information and sends it to the Patient so the patient can pay their balance or setup a payment plan online. Once the patient pays their balance or sets up a plan, clearage takes that information and sends it back to DrChrono.

How to access ClearGage through DrChrono

1. Locate the Patient in DrChrono

2. Click the ClearGage button under App Directory

Note: This will open the ClearGage iFrame in DrChrono
